DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2 and 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Komiya et al. (USPN 6536089 B1).

Komiya teaches a system for high speed welding comprising a housing (30), an inner (22) and outer (21) vessel, and means for rotating (spinning) and evacuating the inner vessel (col 10 lines 23-55, col 11 lines 14-29 and figure 5). The vacuum system would remove oxygen and incorporates ports and valves (col 11 lines 30-63).

Allowable Subject Matter

3. Claims 21-26 are allowed.
4. The following is an examiner's statement of reasons for allowance: The closest prior art teaches an apparatus capable of performing the bonding method but does not teach placement of two materials into the inner vessel for bonding. See Komiya and Hoffman.

Art Unit: 1725

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Claims 3-12 and 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art teaches the invention essentially as claimed but does not teach the system for rotating the inner vessel or a cover for the inner vessel. See Komiya.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hoffman (USPN 6599176 B2, apparatus w/out evacuation means) and Nakamura (USPN 4553690, single vessel).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynne Edmondson whose telephone number is (571) 272-1172. The examiner can normally be reached on Monday through Thursday from 6:30 a.m. to 5 p.m.
